(54) TELEVISION RECEIVER INCORPORATING SATELLITE BROADCASTING RECEIVER

(57)Abstract:

PURPOSE: To easily receive satellite broadcasting and television broadcasting with the operation of one remote controller and to realize channel display or watch display when a video is cut by providing a video selector, a video cut circuit and a TV/character interface circuit.

CONSTITUTION: Based on the control signal of the remote controller 14, the watch display or the channel display is projected through a character generator 49 connected with a control microcomputer 16 and the TV/character interface circuit 33 connected with the character generator 49. Then, along the flow of a television video signal input and a satellite broadcasting video signal, the video selector 10, the video cut circuit 31 and the TV/character interface circuit 33 are successively arranged. Thus receivers which receive the satellite broadcasting and ground broadcasting are integrated and both broadcasting can be easily received by the operation of the one remote controller 14. Besides, the received channel or the time can be displayed on a CRT even when the video is cut.
